

Cyber Security Industry Snapshot

AI Acceleration, Runtime Risk & February Momentum

February has delivered significant momentum across cyber security, with AI governance, runtime protection, and data-centric defence strategies taking centre stage. As enterprises respond to accelerating AI adoption and cloud complexity, measurable risk reduction is becoming the priority. With Cloud & Cyber Security Expo London taking place next month, our cyber team is excited to attend. If you'll be there, let's connect.

Aqua Security Doubles Down on Runtime to Deliver Measurable Cloud Risk Reduction

Against the backdrop of accelerating cloud native and AI-driven development, Aqua Security has entered its next phase of transformation.

By refining its operating model and strengthening executive leadership, the company is sharpening its focus on runtime exposure management. The strategy centres on reducing operational noise, prioritising real production risk, and shortening remediation cycles, ensuring security teams can prevent compromise where it matters most, in live environments.

Varonis to Acquire AllTrue.ai to Manage and Secure AI Across the Enterprise

AI systems are increasingly autonomous, acting directly on enterprise data rather than simply analysing it.

Varonis' acquisition of AllTrue.ai enhances its ability to deliver AI Trust, Risk, and Security Management capabilities alongside its established data security platform. By combining AI visibility, runtime enforcement, and data-layer intelligence, organisations gain greater governance, accountability, and control as AI adoption scales across the enterprise.

Industry News

Keepit Wins 2025 Backup and Disaster Recovery Award

Keepit has been named a 2025 Cloud Computing Backup and Disaster Recovery Award winner for the second consecutive year. Its independent, cloud-native data protection platform continues to stand out for immutable storage and vendor-independent architecture, strengthening SaaS resilience across critical applications.

Cribl Surpasses \$300 Million ARR Amid AI Infrastructure Expansion

Cribl has exceeded \$300 million in annual recurring revenue, driven by increasing demand for AI-ready data infrastructure. Multi-product adoption rose sharply as enterprises sought vendor-agnostic architectures capable of managing escalating telemetry volumes generated by AI workloads, reinforcing the need for modern observability strategies.
